H2020 LC-SPACE-04-EO-2019-2020

Copernicus Evolution – Research for harmonised and Transitional water Observation (CERTO)

Project Number: 870349

Deliverable No: D11.2		Work Package: 11	
Date:	04-FEB-2020	Contract delivery due date	01-FEB-2020
Title:	NEC - Requirement No. 6		
Lead Partner for Deliverable	PML		
Author(s):	Steve Groom, PML		
Dissemination level (PU=public, RE=restricted, CO=confidential)			CO
Report Status (DR = Draft, FI = FINAL)			FI

Acknowledgements

This project has received funding from the European Union's Horizon 2020 research and innovation programme grant agreement N° 870349

1 Executive Summary

- This note confirms compliance of the CERTO project with Ethics “Requirement NEC no 6” should it become necessary

2 Ethics requirement “NEC - Requirement No. 6”

Ethics requirement “NEC - Requirement No. 6” states that “If required, copies of import/export authorisations (with respect data associated with project outputs, as applicable), as required by national/EU legislation must be kept on file.”

At this stage, the consortium does not foresee any data associated with project outputs that would need import/export authorisations; but we will regularly review the situation and will discuss with the EC if necessary.
